Philadelphia

REMARKS

This extraordinary technical library was formed some thirty-five or forty years ago by the late and noted Robert Hoe, who was so well known as a bibliophile. At the time this collection was formed, for the present owners, one of the branches of the Y.M.C.A. of the City of New York, Mr. Hoe gladly gave his time and assistance in helping them to select such titles that would well fit their purpose. In going over the library, one may readily see the work of a master mind in the selection. In the architectural branch, there are numbers of the most desired and early works, covering practically every angle of this trade. In the miscellaneous section will be found almost every desired title on ornaments, fabrics, metal works and other kindred subjects. Also numerous and well illustrated works on early manuscripts and engraving. Among the items of Natural History, which covers every field in its scope, we find some of the earliest and choicest works superbly illustrated, on birds, animals, insects, fish, etc. Also the finest collection of works on flowers and plants we have ever had the pleasure of handling.

A comprehensive idea of this collection can only be obtained by inspecting the books when on exhibition, and to do this, our patrons will have gained for themselves a knowledge hardly obtainable under any other circumstance.

STAN. V. HENKELS.

NOTE

As most of the books in this collection are very large and heavy we have decided, to facilitate the sale, not to show the books at the time of selling. They will be on exhibition up until the time of the sale and we will ask our patrons to kindly examine the books carefully and mark their catalogs accordingly.

CATALOGUE
